SUMMARY

Computer Engineering graduate (SPPU, 8.61 CGPA) with 10 months of production experience building React.js applications in an AI/ML product environment. Proficient in React.js, Redux, Tailwind CSS, JavaScript, Python, and C++. Experienced in REST API integration, reusable component architecture, and Linux-based DevOps automation including Bash scripting and cron jobs.

EDUCATION

Savitribai Phule Pune University
BE in Computer Engineering - 8.61 CGPA
Residential Junior College
H.S.C - 94%
Navbharat Vidyalaya, Dehare
S.S.C - 91.60%

Pune, Maharashtra
Graduated: 2025
Ahmednagar, Maharashtra
2021
Dehare, Maharashtra
2019

PROJECTS

Frontend Feature Development for Production Applications | *React.js, Tailwind CSS, FastAPI Integration*

- Implemented multiple production-ready UI features for enterprise web applications.
- Integrated backend APIs for real-time data display and dynamic user interactions.
- Improved responsiveness and cross-device compatibility through modern CSS frameworks.

AI-Assisted Auto-Annotation Tool | *React.js, Tailwind CSS, MongoDB Atlas, FastAPI*

- Developed an interactive image annotation interface supporting bounding box creation, zooming, and label management.
- Integrated REST APIs to retrieve and manage annotation data within the React frontend.
- Optimized rendering performance for high-resolution images to improve annotation workflow efficiency.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux
Backend/Integration: FastAPI API Integration, JSON Handling
Databases: MongoDB Atlas, MySQL
Programming Languages: Python, C++, SQL
Tools and DevOps: Git, GitHub, Postman, Docker, Linux, Bash Scripting, Cron Jobs
UI/Design: Figma, Canva
Development Tools: Visual Studio Code, Jupyter Notebook, Google Colab

EXPERIENCE

Trainee Engineer

July 2025 – April 2026

Actin Technologies

Pune, Maharashtra

- Developed responsive and scalable UI components for AI/ML-based web applications using React.js and Tailwind CSS.
- Integrated REST APIs built with FastAPI using asynchronous requests to enable dynamic UI updates and seamless frontend-backend communication.
- Designed reusable component architectures and implemented Redux-based state management to manage complex application state across multiple modules.
- Managed asynchronous API requests using Axios/Fetch and implemented efficient frontend data handling.
- Collaborated with UI/UX designers using Figma to enhance usability, accessibility, and visual consistency across application interfaces.
- Built a Linux-based service monitoring utility using Bash scripting and cron scheduling to periodically check application health and trigger automated alerts via Microsoft Teams webhooks and SMTP email notifications.
- Assisted in monitoring and maintaining deployed applications on Linux environments to ensure service reliability and availability.

AIML Intern

Actin Technologies

February 2025 – June 2025

Pune, Maharashtra

- Developed modular frontend components using React.js and Tailwind CSS for AI/ML product features.
- Integrated REST APIs within React applications to retrieve and manage dynamic data across UI workflows.
- Consumed application data stored in MongoDB Atlas to support CRUD-based user interactions.
- Collaborated with the development team to improve UI responsiveness and optimize component performance.
